Variouly described by historians and thinkers as the 'most terrible century in Western history', 'a century of massacres and wars' and the 'most violent century in human history', the 20th century - and in particular the period between the First World War and the collapse of the USSR - forms a coherent historical period which changed the entire face of human history within a few decades. This book examines the trajectory of the Cold War and the fallouts for the rest of the world to seek lessons for the 21st century to manage international relations today and avoid conflict. Written by experts in their field, the chapters provide an alternative perspective to the Western-paradigm dominated international relations theory. The book examines for example whether now in the 21st century the unipolar moment has passed and if the changing economic balance of power, thrown up by globalization, has led to the emergence of a multipolar world capable of economic and multilateral cooperation. It discusses the potential of new cooperative security frameworks, which would provide an impetus to disarmament and protection of the environment globally and asks if nuclear disarmament is feasible and necessary. The book highlights areas in which the potential for conflict is ingrained. Offering Asian perspectives on th-

ese issues - perspectives from countries like Afganistan, Vietnam, West Asia and Pakistan which were embroiled in the Cold War as mere pawns and which have become flashpoints for conflict in our century - this book is an important contribution to the ongoing debate.

Examines the history of the Cold War, reflecting Soviet, East European, Chinese, American, and West European viewpoints, and offering new insights and solutions to long-standing puzzles

The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In *The Cold War*, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers

an engaging new history of how today's world was created.

This is the first book to examine in detail the relationship between the Cold War and International Law.

A leading historian's guide to great-power competition, as told through America's successes and failures in the Cold War "If you want to know how America can win today's rivalries with Russia and China, read this book about how it triumphed in another twilight struggle: the Cold War."—Stephen J. Hadley, national security adviser to President George W. Bush The United States is entering an era of great-power competition with China and Russia. Such global struggles happen in a geopolitical twilight, between the sunshine of peace and the darkness of war. In this innovative and illuminating book, Hal Brands, a leading historian and former Pentagon adviser, argues that America should look to the history of the Cold War for lessons in how to succeed in great-power rivalry today. Although the threat posed by authoritarian powers is growing, America's muscle memory for dealing with dangerous foes has atrophied in the thirty years since the Cold War ended. In long-term competitions where the diplomatic jockeying is intense and the threat of violence is omnipresent, the United States will need all the historical insight it can get. Exploring how America won a previous twilight struggle is the starting point for determining how America can successfully prosecute another high-stakes rivalry today.

In the Cold War era, the confrontation between capitalism and communism played out not only in military, diplomatic, and political contexts, but also in the realm of culture—and perhaps nowhere more so than the cultural phenomenon of sports, where the symbolic capital of athletic endeavor held up a mirror to the global contest for the sympathies of citizens worldwide. *The Whole World Was Watching* examines Cold War rivalries through the lens of sporting activities and competitions across Europe, Asia, Africa, Latin America, and the U.S. The essays in this volume consider sport as a vital sphere for understanding the complex geopolitics and cultural politics of the time, not just in terms of commerce and celebrity, but also with respect to shifting notions of race, class, and gender. Including contributions from an international lineup of historians, this volume suggests that the analysis of sport provides a valuable lens for understanding both how individuals experienced the Cold War in their daily lives, and how sports culture in turn influenced politics and diplomatic relations.

The Cold War was a time of ultimate technological, military, and political competition between the United States and the Soviet Union. Proxy wars were fought between countries supported by one of the two superpowers of the United States or the Soviet Union. The United States and Soviet Union put their powers to the test in the arms race and the space race. This book describes how the landscape of war was forever changed as these formidable forces pursued political power through technology and weapons.

A new book for Paper 2, World History Topic 12: The Cold War: Superpower Tensions and Rivalries (20th Century) Readable and rigorous coverage that gives you the depth of knowledge and skills development required for the Diploma. This book provides the first detailed analysis of international rivalries, the long-standing and often violent confrontations between the same pairs of states. The book addresses conceptual components of rivalries and explores the origins, dynamics, and termination of the most dangerous form of rivalry--enduring rivalry--since 1816. Paul Diehl and Gary Goertz identify 1166 rivalries since 1816. They label sixty-three of those as enduring rivalries. These include the competitions between the United States and Soviet Union, India and Pakistan, and Israel and her Arab neighbors. The authors explain how rivalries form, evolve, and end. The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816-1992. The concepts derived from the study of rivalries are then used to reexamine two central pieces of international

relations research, namely deterrence and "democratic peace" studies. The second half of the book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology, "punctuated equilibrium." The study of international rivalries has become one of the centerpieces of behavioral research on international conflict. This book, by two of the scholars who pioneered such studies, is the first comprehensive treatment of the subject. It will become the standard reference for all future studies of rivalries. Paul F. Diehl is Professor of Political Science and University Distinguished Teacher/Scholar, University of Illinois. He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War*. Gary Goertz is Assistant Professor of Political Science, University of Arizona, and is the coauthor with Paul Diehl of *Territorial Change and International Conflict*.

An analysis of the inevitability of war. As the Cold War fades, leaders and theorists alike speak of a new era, when democracy and open trade will join hands to banish outright war. The author exposes the truth behind this rhetoric: in a world where no international authority reigns, hegemony is the only insurance of security.

This book seeks to answer to a central international politics: why do great powers rise and fall? It provides an innovative argument about how domestic political institutions are the key to a state's ability to amass power and influence in the international system. This text also offers a sweeping historical analysis of democratic and autocratic competitors from ancient Greece through the Cold War. This book employs a unique framework to understand and analyze the state of today's competition between the democratic United States and its autocratic competitors, Russia and China.

Paul Kennedy's classic naval history, now updated with a new introduction by the author. This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day. Challenging the traditional view that the British are natural 'sons of the waves', he suggests instead that the country's fortunes as a significant maritime force have always been bound up with its economic growth. In doing so, he contributes significantly to the centuries-long debate between 'continental' and 'maritime' schools of strategy over Britain's policy in times of war. Setting British naval history within a framework of national, international, economic, political and strategic considerations, he offers a fresh approach to one of the central questions in British history. A new introduction extends his analysis into the twenty-first century

and reflects on current American and Chinese ambitions for naval mastery. 'Excellent and stimulating' Correlli Barnett 'The first scholar to have set the sweep of British Naval history against the background of economic history' Michael Howard, Sunday Times 'By far the best study that has ever been done on the subject ... a sparkling and apt quotation on practically every page' Daniel A. Baugh, International History Review 'The best single-volume study of Britain and her naval past now available to us' Jon Sumida, Journal of Modern History

"Jeremy Friedman's SHADOW COLD WAR examines the battle for political and ideological influence in the newly emerging states of Asia, Africa, and Latin America between China and the Soviet Union from 1956 to 1976. Though both nations espoused Marxism/Leninism, Friedman argues that the Russian and Chinese revolutions were actually the products of two different agendas: anti-capitalism and anti-imperialism, respectively. Those ideological differences fostered different domestic and international policies, a harbinger of the political fissure to come"--Provided by publisher.

A brilliant young historian offers a vital, comprehensive international military history of the Cold War in which he views the decade-long superpower struggles as one of the three great conflicts of the twentieth century alongside the two World Wars, and reveals how bloody the "Long Peace" actually was. In this sweeping, deeply researched book, Paul Thomas Chamberlin boldly argues that the Cold War, long viewed as a mostly peaceful, if tense, diplomatic standoff between democracy and communism, was actually a part of a vast, deadly conflict that killed millions on battlefields across the postcolonial world. For half a century, as an uneasy peace hung over Europe, ferocious proxy wars raged in the Cold War's killing fields, resulting in more than fourteen million dead—victims who remain largely forgotten and all but lost to history. A superb work of scholarship illustrated with four maps, *The Cold War's Killing Fields* is the first global military history of this superpower conflict and the first full accounting of its devastating impact. More than previous armed conflicts, the wars of the post-1945 era ravaged civilians across vast stretches of territory, from Korea and Vietnam to Bangladesh and Afghanistan to Iraq and Lebanon. Chamberlin provides an understanding of this sweeping history from the ground up and offers a moving portrait of human suffering, capturing the voices of those who experienced the brutal warfare. Chamberlin reframes this era in global history and explores in detail the numerous battles fought to prevent nuclear war, bolster the strategic hegemony of the U.S. and the U.S.S.R., and determine the fate of societies throughout the Third World.

Shows how Franklin D. Roosevelt alienated his inner circle of advisors as he built an alliance between him, Winston Churchill and

Joseph Stalin, an alliance that eroded when Harry Truman took the presidency after Roosevelt's death, eventually leading to the Cold War.

Drive critical, engaged learning and advanced skills development. Enabling comprehensive, rounded understanding, the student-centred approach actively develops the sophisticated skills key to performance in Paper 2. This edited volume examines the complexities of the Cold War in Southern Africa and uses a range of archives to develop a more detailed understanding of the impact of the Cold War environment upon the processes of political change. In the aftermath of European decolonization, the struggle between white minority governments and black liberation movements encouraged both sides to appeal for external support from the two superpower blocs. *Cold War in Southern Africa* highlights the importance of the global ideological environment on the perceptions and consequent behaviour of the white minority regimes, the Black Nationalist movements, and the newly independent African nationalist governments. Together, they underline the variety of archival sources on the history of Southern Africa in the Cold War and its growing importance in Cold War Studies. This volume brings together a series of essays by leading scholars based on a wide range of sources in the United States, Russia, Cuba, Britain, Zambia and South Africa. By focussing on a range of independent actors, these essays highlight the complexity of the conflict in Southern Africa: a battle of power blocs, of systems and ideas, which intersected with notions and practices of race and class This book will appeal to students of cold war studies, US foreign policy, African politics and International History. Sue Onslow has taught at the London School of Economics since

1994. She is currently a Cold War Studies Fellow in the Cold War Studies Centre/IDEAS

Read article...

The Third World Beyond the Cold War presents an overview of the changes brought about in Third World countries since the end of the cold war. The book does so in two ways: by highlighting major areas of change in the Third World, and using regional case-studies as a means of isolating changes specific to certain regions. The themes chosen by the editors—economics, politics, security—are not, of course, exhaustive, but are broadly interpreted so as to encompass the major areas of change among Third World countries. The regional case-studies—Asia-Pacific, Latin America, South Asia, Africa, the Middle East—were selected to bring out both the themes and the diversity of experience. The essays, written by leading scholars in the field of International Relations, caters for a variety of constituencies: those who seek the 'big picture' in understanding the Third World in International Relations, those who look for general patterns, explanations, and trends in Third World politics, and those who seek up-to-date information and analysis on the progress of different regions. Explores the UN's track record of military action, from cold war 'brushfire' peace-keeping to the fractured globalisation of the contemporary world MacQueen assesses armed humanitarian intervention on a region-by-region basis, from the Balkans to Africa, the Middle East to Southeast Asia. Using empirical evidence, he compiles a 'balance sheet' of the UN's successes and failures and asks hard ques-

tions about humanitarian intervention's short and long-term value.* Presents a concise analytical overview of the theoretical, moral and practical issues* Case study chapters on sub-Saharan Africa, the Balkans and East Timor* Confronts hard questions about the short and long-term value of these interventions

This 2nd edition is a revised version of the bestselling 1st edition, written by leading IB practitioners to specifically match the International Baccalaureate 2015 History curriculum. With a new emphasis on cross-regional wars, this book comprehensively covers the revised Causes of Wars topic. It will equip students with the knowledge and skills needed to answer essay questions on Paper Two and document-based questions on Paper One. This book is also accompanied by an enhanced eText containing further worksheets, quizzes to test knowledge and examination skills, and enlarged source material. The book includes: clear overview and analysis of key events practice in analysing source material support throughout for new curriculum features, including key concepts and international mindedness approaches to learning highlighted in each activity throughout the book focus on the examination requirements, with 'hints for success' throughout, as well as quizzes on the eText an updated Theory of Knowledge chapter with questions throughout to help with wider research and discussion.
