The purpose of this publication is to provide the background rationale and support for WHO's working paper Dealing with uncertainty - how can the precautionary principle help protect the future of our children?, prepared for the Fourth Ministerial Conference on Environment and Health held in Budapest, Hungary, in June 2004. The debate around the precautionary principle has provided many insights into how to improve public health decision-making under conditions of uncertainty. This publication should further support approaches to attaining the concurrent goals of protecting adults, children and future gener-

ations and the ecosystems on which we depend and enhancing economic development, sustainability and innovation in science, research and policy. [Ed.]

Takaful, which means 'co-operative', is an insurance approach that is instrumental to providing insurance services to Muslims and others with religious objections to aspects of conventional commercial insurance models, specifically interest payments, uncertainty, or gambling kind of transactions.

organization, management and strategies of Greek family shipping companies.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both

solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The eighth volume in the annual series sponsored by BBVA as part of its OpenMind initiative devoted to disseminating knowledge on key issues of our time, The Search for Europe analyses the present and future of the old continent and its integration project, which is certainly the most ambitious political and economic integration project ever attempted in history, and a benchmark for similar processes in other regions.

Makes a great present for students, pupils and teachers. Give it away on Christmas, Easter and Birthdays.

Insurance Coverage of Intellectual Property Assets, Second Edition is the best resource to comprehensively analyze the insurance protection issues that must be considered when an intellectual property dispute arises. From determining the scope of coverage under a policy, to tendering of a claim, to seeking remedies when

coverage has been denied, this essential guidebook details the interactions among policyholders, insurers and the courts. You'll find comprehensive and timely analysis of federal and state case law and major commercial insurance policy provisions that address: The extent of insurance coverage under the "advertising injury" and "personal injury" provisions Language in policies that limits or excludes coverage for intellectual property claims Public policy exclusions to coverage for claims of an infringement undertaken with intent to harm Interpreting ambiguous language in insurance policies Defending a claim under a "reservation of rights" and potential conflicts of interest triggered thereby Forum selection and choice of law And more. In addition, there's detailed discussion and comparison of the actual language used in most commercial insurance policies and the most recent Insurance Services (ISO) policies.

Private persons frequently guarantee business debt incurred by family members, friends, or employers, often while unaware of the financial risk they

are exposing themselves to. This book provides an analysis of the law's response to potential unfairness in the practice across 22 EU Member States, setting an agenda for legal reform.

Revolution and the Republic provides a new and wide-ranging interpretation of political thought in France from the eighteenth century to the present day. At its heart are the dramatic and violent events associated with the French Revolution of 1789 and the birth of the First Republic in 1792. For the next two centuries, writers in France struggled to make sense of these and subsequent events in French revolutionary history, producing a rich and perceptive analysis of the nature of republican government. But, as Revolution and the Republic shows, these important debates were not limited to the narrow confines of politics and to the writing of constitutions. Such was their significance that they occupied a central place in discussions about religion, science, philosophy, commerce, and the writing of history. They also shaped arguments about the character of France and the French nation as well as

polemics about the role of intellectuals in French society. Moreover, they continue to be of importance in France today as the country faces the challenges posed by globalisation, multiculturalism, and the reform of the welfare state. Integrating the perspectives of intellectual history, political theory, social and cultural history, and political economy, Jeremy Jennings has written a study of political ideas that appeals to all those interested in the history of modern France and Europe more generally.

"RAND social and economic well being"--Title page. This collection of essays critically evaluates the legal framework necessary for the use of autonomous ships in international waters. The work is divided into three parts: Part 1 evaluates how far national shipping regulation, and the public international law background that lies behind it, may need modification and updating to accommodate the use of autonomous ships on international voyages. Part 2 deals with private law and insurance issues such as collision and pollution liability, salvage, limitation of liability and allocation of risk between carrier and cargo interests. Part 3

analyses international convention regimes dealing with maritime safety and other matters, arguing for specific changes in the existing conventions such as SOLAS and MARPOL, which would provide the international framework that is necessary for putting autonomous ships into commercial use. The book also takes the view that amendment of international conventions is important in the case of liability issues, arguing that leaving such matters to national law, particularly issues concerning product liability, could not only restrict or hinder the availability of liability insurance but also hamper the development of technology in this field. Written by internationally-known experts in their respective areas, the book offers a holistic approach to the debate on autonomous ships and makes a timely and important contribution to the literature.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both system-

atic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also

serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Lithium-Ion Batteries Hazard and Use Assessment examines the usage of lithium-ion batteries and cells within consumer, industrial and transportation products, and analyzes the potential hazards associated with their prolonged use. This book also surveys the applicable codes and standards for lithium-ion technology. Lithium-Ion Batteries Hazard and Use Assessment is designed for practitioners as a reference guide for lithium-ion batteries and cells. Researchers working in a related field will also find the book valuable.

The Supreme Court ruling in *Global Process System Inc. v Syarikat Takaful Malaysia Berhad (The Cendor MOPU)* created a shock wave in the London marine insurance market as the Supreme Court decision changed the boundaries of doctrine in respect of the meaning of "perils of the sea" and "inherent vice". Both phrases play an important role in the insurance market, affecting both assureds and insurers and their respective interests under all classes of marine insurance policies. This book reviews the origin of the clauses "perils of the sea" and "inherent vice" by tracing back through the early cases in order to understand the origin, and noting how and why the changes occurred. It will examine how the law has been developed in the recent cases, discussing whether the Supreme Court case, *The Cendor MOPU*, has overruled the previous cases in terms of the words "inherent vice" and "perils of the sea". Considering the impact of *The Cendor MOPU* decision in respect of the Marine Insurance Act 1906 as well as the standard cargo clauses, it evaluates whether the decision is consistent with the 1906 Act and the Clauses,

discussing the effect of the decision on recent cases and on the insurance market.

The official report that has shaped the international debate about NSA surveillance "We cannot discount the risk, in light of the lessons of our own history, that at some point in the future, high-level government officials will decide that this massive database of extraordinarily sensitive private information is there for the plucking. Americans must never make the mistake of wholly 'trusting' our public officials."—The NSA Report This is the official report that is helping shape the international debate about the unprecedented surveillance activities of the National Security Agency. Commissioned by President Obama following disclosures by former NSA contractor Edward J. Snowden, and written by a preeminent group of intelligence and legal experts, the report examines the extent of NSA programs and calls for dozens of urgent and practical reforms. The result is a blueprint showing how the government can reaffirm its commitment to privacy and civil liberties—without compromising national security.

In the United States, some

populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied

stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

In recent public workshops and working group meetings, the Forum on Microbial Threats of the Institute of Medicine (IOM) has examined a variety of infectious disease outbreaks with pandemic potential, including those caused by influenza (IOM, 2005) and severe acute respiratory syndrome (SARS) (IOM, 2004). Particular attention has been paid to the potential pandemic threat posed by the H5N1 strain of avian influenza, which is now endemic in many Southeast Asian bird populations. Since 2003, the H5N1 subtype of avian influenza has caused 185 confirmed human deaths in 11 countries, including some cases of viral transmission from human to human (WHO, 2007). But as worrisome as these developments are, at least they are caused by known pathogens. The next pandemic could well be caused by the emergence of a microbe that is still unknown, much as happened in the 1980s with the emergence of the human immunodeficiency

virus (HIV) and in 2003 with the appearance of the SARS coronavirus. Previous Forum meetings on pandemic disease have discussed the scientific and logistical challenges associated with pandemic disease recognition, identification, and response. Participants in these earlier meetings also recognized the difficulty of implementing disease control strategies effectively. Ethical and Legal Considerations in Mitigating Pandemic Disease: Workshop Summary as a factual summary of what occurred at the workshop. Insurance Claims provides an accurate summary of the law as it relates to insurance claims, which means largely, but not exclusively, claims against insurers and insurance brokers. It is aimed at those involved in the application of the law on a daily basis, whether as solicitors, barristers or insurance claims handlers. The new edition is one of the first titles to cover and offer detailed commentary on the Insurance Act 2015 which comes in force in August 2016. Insurance Claims, Fourth Edition includes coverage of the following significant changes in legislation and case law: The Insurance Act 2015 comes into force

on 12 August 2016 and makes far-reaching changes to insurance law in England and Wales: Introduces a new pre-contractual duty of fair presentation in place of the duty to disclose material facts/duty not to misrepresent material facts; Makes significant changes to remedies for breach of pre-contractual duty, breach of warranty and breach of other terms 'not relevant to the actual loss'. The Enterprise Act 2016 amends the Insurance Act 2015 and introduces a general right to damages for late payment of insurance claims (with effect from 4 May 2017). The Third Parties (Rights Against Insurers) Act 2010, is amended by the Insurance Act 2015 and by the Third Parties (Rights Against Insurers) Regulations 2016, and comes into force on 1 August 2016. The Consumer Rights Act 2015 re-enacts, with minor changes, the law on unfair terms in consumer contracts (formerly the Unfair Terms in Consumer Contracts Regulations 1999). *Teal v Berkeley* in the Supreme Court on the order in which losses are allocated to policies of insurance. *Aspen v Adana* in the Court of Appeal on the meaning of 'product' and cover for de-

fective installation in product and public liability insurance. *International Energy Group Ltd v Zurich Insurance plc* in the Supreme Court on contribution between insurers in cases within the 'Fairchild enclave'. *AIG v ILP* in the Court of Appeal on aggregation in solicitors' indemnity insurance. Contents: 1: The Basics; 2: The Claimant; 3: The Contract of Insurance; 4: Causation of Loss; 5: Proof of Loss; 6: Measurement of Loss; 7: Presentation of Claims; 8: Claims Handling; 9: Insurance Litigation; 10: Alternatives to Litigation; 11: Insurers' Defences; 12: Subrogation; 13: Double Insurance and Contribution; 14: Reinsurance; 15: Conflict of Laws; 16: Claims Against Insurance Brokers; 17: Specific Types of Insurance. [Subject: Insurance Law] Good Faith and Insurance Contracts sets out an exhaustive analysis of the law concerning the duty of utmost good faith, as applied to insurance contracts. Now in its fourth edition, it has been updated to address the arrival of the Insurance Act 2015, as well as any references to new case law. In addition, it synthesises all known judicial decisions by the English Courts concerning good faith in this

area. This book is still the only text devoted to a discussion of the duty of utmost good faith applicable to insurance contracts. As good faith is an issue which arises in respect of all insurance contracts, it is a book which will be extremely useful to lawyers involved in insurance as well as insurance practitioners.

The investment and securities industry is rebounding from the dismal markets of the early 2000s. Improved corporate profits, low interest rates and efforts to improve corporate governance have led the way, despite recent scandals in the mutual funds industry. Meanwhile, the investment industry is increasingly a global business. This is partly due to the needs of multinational corporations to list their stocks or issue debt in more than one nation. For example, ADRs (American Depository Receipts) are increasingly popular instruments. Cross-border investments and acquisitions continue at a rapid pace. Discount brokerages are enjoying improved levels of trading, while investment banks are developing new ways to create lucrative fees. This carefully-researched book (which in-

cludes a database of leading companies on CD-ROM) is a complete investments, securities and asset management market research and business intelligence tool -- everything you need to know about the business of investments, including: 1) Investment banking, 2) Stock brokers, 3) Discount brokers, 4) Online brokers, 5) Significant trends in financial information technologies, 6) Asset management, 7) Stock ownership by individuals and households, 8) 401(k)s and pension plans, 9) Mutual funds, 10) ETFs (Exchange traded funds), 11) ECNs (Electronic Communication Networks), 12) Developments at the NYSE and other exchanges. The book includes a complete chapter of vital industry statistics, an industry glossary, a complete list of industry contacts such as industry associations and government agencies, and our in-depth profiles of more than 300 leading firms in the investment and asset management business. A CD-ROM database of these firms is included with the book.

Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks.

Written by a team of top academics and highly-experienced legal practitioners, this is a very complex area of law. It provides both a critical analysis on contemporary legal issues concerning offshore contracts, and an in-depth account of the numerous liability regimes inherently connected to offshore operations. Key features of Offshore Contracts and Liabilities: Detailed insight into contemporary legal issues concerning offshore contracts, including Supplytime and Heavycon In-depth analysis of the current liability regimes with clear reference to contemporary industry practice Thorough examination of the current state of the law from national, regional and international perspectives Up-to-date coverage of hot topics such as liability for offshore installations, knock-for knock agreements in offshore contracts and recently-developed new standard forms, such as Windtime.
