So you've just gotten inter-

ested in CNC, and you notice the waters look a little deep. How do you get started? Here are 6 things you should learn about first, before you buy a CNC machine, before you do anything else, just to get oriented and see what this CNC thing is all about.

### **6 Things A Brand New CNC'er Should Learn to Get Started ...**

Getting Started Video One of the CNC projects you will be eligible to download has been created so that you can follow along with our Getting Started Video . This video will answer a lot of questions a new user may have and get you off on a good foot.

### **Getting Started - Design & Make**

Get Started with G-Code. Ready to start using g-code to program your machines? Begin by reviewing your machine's unique coding chart. Remember, every machine is a little different. A Haas' code for a function might not be the same as an Anilam's code for that function. You have to know which codes your specific machine uses for the tasks ...

### **Getting Started with G-Code | CNC Programming | Autodesk**

What can you make with a CNC? CNC's are incredibly versatile and allow you to cut a variety of different types of product and materials. The exact abilities of a machine will vary with size, rigidity and power. Typically most CNC routers can cut soft and hard wood, plastics, other composites and non-ferrous metals.
