F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham "fan" suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

A Veloce Classic Reprint. Tales of Triumph Motorcycles and the Meriden Factory is a delightful and often humorous account of life with the Triumph motorcycle company in its heyday. Hughie Hancox started work with the Triumph Engineering Company (manufacturer of Triumph motorcycles) in 1954 and, apart from a short break for national service, stayed with the company until it closed in 1974. In his time with Triumph, Hughie worked in the Experimental, Service, Product Road Test, Toolroom, Final Production Assembly and Service Repair Shop departments before joining the staff in the Service Office. He also served as a Technical Writer/Advisor/Customer Relations "Trouble Shooter." Even his National Service was spent with the "White Helmets" motorcycle display team! Here, Hughie tells the story of his life in the famous Meriden factory and of his many adventures with Triumph motorcycles and Triumph people and, by doing so, records the fascinating inside story of one of Britain's greatest motorcycle marques.

In this book of over 500 pages Ermanno Cozza, the true historic memory of Maserati, passionately tells a story packed with behind the scenes truths - right up to today - that have never before been published. He covers half a century of the company's life, which he lived in close contact with the great motor racing champions, ingenious technicians, designers and, naturally, company life as well, of course, as the unforgettable cars. A carefully chosen collection of photographs and other illustrations complete this invaluable book. "Over 66 years have passed since I walked through the gates of Officine Alfieri Maserati (the Alfieri Maserati Workshops). It was in 1951, and in all that time I can truly say that Maserati took hold of my heart. The factory, the men and the cars have indelibly marked moments in my life. Today, many people consider me to be the living memory of Maserati and, in that way, take me back to those earlier days. In this book, I have tried to convey the excitement of living the Maserati legend so that, step by step, I cover the most important moments of my long and extraordinary experience: the excitement of participation, the joy and pain, the cars and the defeats, the ambitions and the professional difficulties. While I have always enjoyed good health, over the years I have been infected with the Maserati 'virus' of which I believe I have been a carrier all this time - and it is a virus of which I never want to be cured" Ermanno Cozza

The history of hot rodding and performance cars has been well chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like "back in the day." The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were

a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here, longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and a overview of the giant mail-order speed shops of today.

Learn how to build an affordable hot rod following the advice of the masters! In *How to Build Affordable Hot Rods*, author and life-long hot rod aficionado Tony Thacker takes you through the process of building a hot rod on a budget. Drawing on his own extensive experience of both buying and building rods, Thacker explores the good, the bad, and the ugly. The good was setting a land speed record at Bonneville, the bad was buying a rod from which the previous owner had "swapped out" the good engine,

and the ugly--well, let's just not go there. *How to Build Affordable Hot Rods* includes extensive how-to sections that cover step-by-step chassis builds for Model A, 1932, and 1936 Fords, including front- and rear-end setups. The in-depth chassis builds are complemented with sections on powertrain choices, bodywork and roof chops, wheels and tires, and wiring and paint. Also included are chapters on interiors and the all-important details that individualize any project to ensure that it stands out from the rest. When Henry Ford introduced his beloved Model T, he unwittingly gave the average person the means to go racing. Prior to the T, racing was mostly a sport of the rich, but that changed with the Model T. Stripped of fenders and hopped up with speed parts, T speedsters ruled, and it wasn't long before enthusiasm on the track translated to the street and the term hot rod entered the vernacular. Of course, it didn't need to be a Ford (and still doesn't), but the easiest and therefore cheapest route to Hot Rod Boulevard is down the Ford road. The journey accelerated after World War II, as hot rodding boomed with the growth of speed shops, car shows, drag racing, talented and trained GIs returning home, and the launch of Hot Rod magazine to spread the gospel far and wide. More than 100 years after the original Model T, hot rodding remains alive and well in the Australasia, Europe, and (of course) its birthplace the US.
