The Great Convergence — Richard Baldwin | Harvard ...

The great convergence details the evolution of globalization through human history and in particular the differences between different eras of globalization. The author gives a narrative on the order of human history of how the step from production to consumption has evolved and how each era of globalization has been driven by different factors and how those differences led to different production techniques.

This triggered a self-fueling cycle of industrial agglomeration and growth that propelled today's rich nations to dominance. That was the Great Divergence. The new globalization is driven by information technology, which has radically reduced the cost of moving ideas across borders. This has made it practical for multinational firms to move labor-intensive work to developing nations.
