#### ISO 27701: Will it Be the New GDPR Certification ...

The International Organization for Standardization (ISO) recently published a new environmental management standard, ISO 14051.This new ISO standard is designed to reduce a facility's environmental impact while increasing profitability through the use of Material Flow Cost Accounting (MFCA). But how does it work?

ISO 27701 is the first ISO standard to reference to external frameworks or publications not actually developed by ISO. In this case, that external reference was none other than the headline-grabbing European Union's General Data Protection Regulation ( GDPR ).

The new ISO 9001 and ISO 14001 To become the best, and remain the best, organizations need a management system that helps them deliver the best products and services for the marketplace, while taking into account the needs of the environment in which they are working.

#### ISO - Just out! The new ISO 9001 and ISO 14001

The new standard complements ISO 14008, Monetary valuation of environmental impacts and related environmental aspects, published in March 2019. It describes methods for valuing environmental aspects and impacts, providing the essential data that feeds into such cost-benefit analyses. Hence, the two standards dovetail with one another.
